What: Clarification Reminder for Genesee County Water Customers

Additional Info: Over the past several days the Genesee County Water and Waste Services (WWS) office has received several phone calls from residents and our community customers, relaying concerns and inquiries regarding the origin of their drinking water. These calls come as there has been a large amount of attention being paid to City of Flint water customers, and the source and quality of their water supply.

To reduce any confusion, Genesee County WWS would like to clarify that there has been no change in the source or quality of the water being delivered to our customers. No retail Genesee County customers have received any drinking water from the City of Flint, and continue to receive water from the same source, Lake Huron via DWSD (Detroit). This will continue until the KWA Pipeline is completed in 2016, at which point customers will continue to receive Lake Huron Water through our own water supply system.

To further clarify: Genesee County supplies water to the following communities: Burton, Clayton Township, Clio, Davison Township, Flint Township, Flushing City, Flushing Township, Gaines Township, Genesee Township, Grand Blanc Township, Montrose City, Montrose Township, Mount Morris City, Mount Morris Township, Mundy Township, Richfield Township, Swartz Creek, Thetford Township, and Vienna Township.

If you live in one of the above communities, are a retail customer, and receive your bill directly from your municipality or from Genesee County, you are NOT receiving Flint River water. If your community is not listed above, but you do not live in the City of Flint, you most likely are on well water, or your community has its own water supply system.

If any Genesee County WWS customer has a question regarding their water service, please call our offices at 810-732-7870.
